MY LIFE PHILOSOPHY

*Progress is not achieved by luck or
accident, but by working on
yourself daily.*

— Epictetus

SUMMARY

Highly motivated aspiring software developer with a solid foundation in computer science and programming. Adept at working in a team to deliver high-quality software solutions. Strong problem-solving skills and a keen attention to detail, coupled with a commitment to staying current with industry trends and emerging technologies.

PROJECTS

ConnectBuddy Messenger

11/2023 - 12/2023

- A messaging web application powered by React, Typescript, Tailwind CSS, Framer Motion & Firebase. Users can effortlessly register, personalized profiles and participate in teams for streamlined collaboration. Implemented a chat feature as well as voice & video call functionality. The application prioritizes user control, allowing the flexibility to block or connect with others based on individual preferences.

DevTalk Forum

11/2023 - 11/2023

- A forum web application designed for seamless user interaction, built with React, Tailwind CSS, Framer Motion & Firebase. Engage in the creation and sharing of content through intuitive post creation, while fostering community engagement with likes and comments. The implementation of CRUD operations guarantees a smooth and efficient user experience, allowing for the effortless management of content.

GifLab

10/2023 - 10/2023

- A GIF platform project built with JavaScript, HTML & CSS. An immersive space where users can seamlessly browse, like, upload, and search for an endless array of animated expressions. Engage with the community by expressing appreciation through likes and contribute your own animated creations to the platform.

Portfolio

08/2023 - Present

- A portfolio showcasing the projects I have worked on since the start of my journey as a software developer. It is a representation of my growth, skill set & devotion to my dream of becoming a great developer.
